Summary

Full Stack Developer with hands-on experience building responsive frontend interfaces and scalable backend systems using React.js, Next.js, Node.js, and Express.js. Proficient in designing APIs using both REST and GraphQL, implementing JWT-based authentication, OAuth2, role-based access control (RBAC) and integrating databases like MongoDB and MySQL. Passionate about full stack technologies and actively learning DevOps tools. Proven ability to deliver production-ready features, collaborates with clients, and contributes to full project lifecycles in agile teams.

EDUCATION

Lok Jagrut University   Ahmedabad
Bachelor of Engineering in Computer Science   *May 2021 – May 2025*
SPI – 7.93

EXPERIENCE

React & Node Developer   Feb. 2025 – Present
Promethean tech   *Infocity, Gandhinagar*

- Developed and maintained React.js and Next.js frontends for 3+ client projects, improving performance and scalability by 30%.Integrated RESTful APIs and worked with backend developers to implement scalable Node.js services.
- Implemented JWT-based authentication flows and contributed to API debugging and optimization using browser network tools. Gained experience with Redis caching, and API performance tuning.
- Collaborating closely with clients to gather requirements and deliver optimized, user-friendly interfaces using TypeScript, Git, and team workflows with Bitbucket.
- Used modern JavaScript frameworks and AI tools like Cursor to speed up development time by 35% and reduce bugs. And expanding some knowledge in backend development with Node.js, working on APIs and improving overall system efficiency.

Full Stack Developer   July. 2024 – Jan. 2025
Arraysoft technology   *Gandhinagar*

- Developed a consulting group website using modern web technologies, enhancing online presence and client engagement.
- Built and maintained RESTful APIs using Node.js and Express.js, improving server-side performance and maintainability.
- Integrated MongoDB with efficient schema design and used Postman for testing and debugging APIs. Added basic role-based access control and JWT authentication for secure access control.
- Architected and developed RESTful APIs using Node.js and TypeScript for scalable backend systems, improving data reliability and reducing query latency by 20%. Used Swagger for API documentation .

PROJECTS

FleetLink – Logistics Vehicle Booking System | *Node.js, Express.js, MongoDB, Next.js, Tailwind CSS*   [*Github*](Github)

- Developed a full-stack logistics platform enabling users to book transport trucks based on capacity and route (pincode-to-pincode) with a seamless UI/UX experience.
- Engineered real-time vehicle availability system and implemented smart matching logic between load requirements and vehicle capacity, boosting operational efficiency by 40%.
- Implemented unit and integration testing for backend APIs using Jest and Supertest, achieving over 90% test coverage for critical booking and vehicle endpoints.

Jobify – Full Stack Job Portal | *React.js, Express.js, Node.js, MongoDb*   [*Github*](Github)

- Designed and built a full featured job portal with MERN stack , supporting role based access for recruiters and job seekers.
- Implemented secure login and session management using JWT and bcrypt.
- Developed scalable APIs, optimized MongoDB queries with indexes, and documented endpoints with Swagger
- Implemented CRUD operations for managing job listings, profiles, and applications. Optimized performance and user experience through responsive UI.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, HTML/CSS,
Frontend frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Bootstrap, Tailwindcss, Typescript, Shadcn, Aceternity UI
Backend & Database: RESTful APIs, JWT, Redis, Swagger, Socket.IO, Postman,GraphQL, GitHub Actions, Nodemailer , MySQL , MongoDB
Developer & AI Tools: Git, Cursor, VS Code, Tabnine, GitHub Copilot, Bitbucket
